INTRODUCTION

- A calculator is a device that performs arithmetic operations on numbers. Basic calculators can do only addition, subtraction, multiplication and division mathematical calculations.

- Most calculators these days require electricity to operate or are battery-powered calculators. Calculators work by performing programmed functions based on numerical inputs.

FRONTEND DYNAMIC FEATURE OF WEBSITE

- **It's easy to modify or update data.**
- **It provides a user-friendly interactive interface for users.**
- **proves smooth navigation.**
- **provide interactive user interface**
- **It provides a better user experience.**
- **It provides real-time data.**

RESULT

100% completion if the above tasks
